Projects

SinhgadConnect – AI-Powered College Community Platform

[\[Live Link\]](#)

- Engineered a full-stack community platform enabling students to share posts, questions, and announcements using React.js, Node.js, Express.js, and MongoDB.
- Implemented a Retrieval Augmented Generation (RAG) chatbot that retrieves relevant posts via cosine similarity and generates grounded responses using Google Gemini API.
- Built semantic search using 768-dimensional embeddings for intelligent content discovery.
- Integrated AI-powered features including automatic post summarization, sentiment analysis, and tag generation.
- Designed a responsive React frontend with real-time updates and a modern user experience.

Pixie – Photo Sharing Social App

[\[Live Link\]](#)

- Designed, developed, and deployed a full-stack social media application enabling real-time photo uploads and a dynamic public feed using React.js and Appwrite.
- Implemented secure authentication and profile management features to ensure user data privacy.
- Built responsive user interfaces and optimized performance for seamless user experience across devices.
- Leveraged Appwrite's Backend-as-a-Service capabilities for database management, authentication, and storage.
